Before starting the installation, ensure your hosting server or local workstation satisfies the required technical stack.

Requirement	Minimum	Recommended	Notes
PHP Version	8.2.0	PHP 8.2 or 8.3	Required by Laravel 12 framework.
Database Engine	MySQL 8.0+ / MariaDB 10.4+	MySQL 8.0+	Must support `utf8mb4_unicode_ci`.
Web Server	Apache 2.4+ / Nginx 1.20+	Apache with mod_rewrite	Document root must point to `public/`.
PHP Extensions	`BCMath`, `Ctype`, `cURL`, `DOM`, `Fileinfo`, `JSON`, `Mbstring`, `OpenSSL`, `PCRE`, `PDO`, `PDO_MySQL`, `Tokenizer`, `XML`.		
Flutter SDK	Flutter with Dart 3.13.1 or compatible	Match pubspec.yaml and the lockfile	The app declares Dart SDK ^3.13.1. Verify flutter --version before installing dependencies.

Conclusion Section

Use this guide to configure Quizs, verify the actual app behavior, and keep administrator content, server configuration, and native app changes in their correct places.

Administrator access

Open your own backend domain followed by /admin/login. Use the credentials created for that deployment. Accounts, passwords, and URLs from unrelated reference projects do not apply to Quizs.

Release verification

Complete a category, quiz, question, attempt, result, target/profile, notification, and attendance test. Confirm native integrations separately on the intended device and provider account.
